

Allergy, Dermatology, and Otology

Feline Skin Disease:

Make sure there are no symptoms typical of Classic Dermatitis:

- Herpes Virus/Shingles Dermatitis - Bloody Face Syndrome
- Swiss Cheese Draining Sores - Deep Bacterial/Fungal infection
- Kittens or Shelter cats - Dermatophyte/Ringworm
- Cats starting OLDER than 10 yrs - Para-Neoplastic Dermatitis
- Sores around the mammary-chain - Auto-Immune (Lupus/Pemphigus)

All other Patterns and Symptoms are Feline Atopic Allergy syndrome:

- Focal crusts on the body - Miliary Dermatitis
- Head & Neck Sores Dermatitis
- Bald-Belly legs or Back - Allergic Alopecia
- Hair-loss and crusts on the arms - Mural Folliculitis
- Ulcers on the upper lip - Indolent Rodent Ulcers
- Swollen Chin - Fat Chin Syndrome
- Mouth or Gum sores - Stomatitis
- Eosinophilic Plaques or Granulomas

Feline Atopic Allergy Syndrome can be caused and triggered by many allergens:

Insects/Mites/Mosquitoes/Fleas + Pollens/Molds + Foods

We will progress through the treatment steps every 3 weeks to find the SAFEST + MOST EFFECTIVE + COST EFFECTIVE treatment that the cat tolerates.

=====

Step 1 60% Effective and Very Safe (inexpensive)

Apply **Revolution PLUS** every 30 days as the best treatment and prevention for insects/mites/mosquitoes/fleas (must be **PLUS** product)

If tolerated - Apply **Genesis Liquid** every 12-24 hours and allow 5 min to dry

Chlorpheniramine 4mg tablets

Give 1/2 tablet every 12 hours or 1 tablet every 24 hours to prevent symptoms

=====
